

The Perfect POS Software for Any Restaurant

Thousands of customers have benefited from the superior operational efficiency and impressive ROI driven by restaurant POS software from Focus POS. With more than 20 years in the industry, Focus POS knows what it takes to meet the unique business needs of each customer and makes it easy for restaurants to stay competitive and on the cutting edge of the industry.

Solutions

Our restaurant POS solutions help customers optimize labor and inventory in order to maximize efficiency and profits.

- **Traditional Restaurant POS Software:** Our feature-rich traditional POS offering helps restaurant owners manage every detail of their establishments.
- **Mobile POS:** Our mobile POS solutions bring the robust functionality and reliability of our traditional POS software to smartphones and tablets, making it easier than ever to make sales beyond the counter.
- **Multi-Check Dashboard:** This dashboard increases efficiency by enabling servers to view all open checks at once and perform multiple functions on several checks simultaneously – without leaving the dashboard.
- **Online Ordering:** This solution allows restaurants to increase sales with an online and mobile presence. Orders are processed directly to your POS without additional interaction from the staff.
- **nFocus:** The nFocus dashboard provides an overview of your restaurant's operations and has extensive options for accessing detailed information – so you can spend more time running your business and less time running reports.
- **myFocus WebSuite:** myFocus WebSuite is a group of programs that enable owners to more efficiently run their restaurants. This offering includes a web-based reporting platform, a mobile app, and customer loyalty and gift card programs.
